Yamen Amjed Mustafa

Software Engineer

Email: yamenamjed22@gmail.com **Phone**: 000962792960177

LinkedIn: [Yamen-Amjed] **GitHub**: [My GitHub]

A dedicated Software Engineer with 1 year of hands-on experience in FinTech projects, specializing in backend and enterprise web applications. Experienced in Core Banking and Wallet systems, working with JSF and Primefaces to develop business-driven solutions. Strong background in Java, Spring Boot, RESTful APIs, and database management. Proven ability to debug complex issues, implement new business requirements, and deliver reliable, secure financial software.

Professional Experience

Software Engineer, Futeric, Amman, Jordan (01/2025- present)

Futeric is a fintech-oriented company delivering financial and digital banking solutions. As a Software Engineer, I contribute to enterprise-level fintech systems including **core banking**, **wallet** systems, and **financing platforms.**

Key Responsibilities & Achievements:

- Worked on **Core Banking and Wallet systems**, contributing to critical financial workflows.
- Developed and maintained enterprise web applications using **Java**, **JSF**, and **PrimeFaces**.
- Collaborated with business and technical teams to translate financial requirements into technical solutions.
- Participated in enhancing system usability while maintaining compliance with fintech standards.
- Fixed production bugs and performance issues, ensuring system stability and reliability.

Academic & Personal Projects

Backend Developer – Kickoff Net (Graduation Project)

Java | Spring Boot | PostgreSQL | REST APIs

- Designed and developed backend services using **Spring Boot**.
- Built relational database schema using **PostgreSQL** with **JPA/Hibernate ORM**.
- Created RESTful APIs for match registration and football field management.
- Tested and validated APIs using **Postman**.

Education

BSc, Computer Information and technology – Yarmouk University (10/2020- 07/2024) with GPA **A**

Skills

- Java, python
- Spring Boot, JSF, Collections, Microservices and Monolithic Architecture.
- Object Oriented Programming, Data Structures and Algorithms
- RESTful API design and Implementation.
- Relational Database, Oracle, PostgreSQL, ORM, JPA.
- Clean Code, Solid Principles.
- Ability to work in an Agile environment.
- Maven, Postman, Swagger.
- Bit-Bucket, azure and GitHub.
- Creative thinking and Excellent communication skills.
- Problem Solving.
